

Q2: Can a dystopian setting influence a human into forgetting their morals?

- In the first few chapters, Winston mentions how the children are also involved in the government's schemes. The role of the children were to watch over their parents and report any suspicious activity to the government. Since children are typically honest, the government took advantage of that opportunity and came up with the organization "The Junior Spies".
- In the reading "Moral Relativism and Majority Rule", the author explains that moral standards are based on what the majority believes and it can vary depending on the group's ideology. The concept of relativism implies that it is possible for different moral judgements to be correct depending on the circumstance.
- For example, in the 1930s-1940s Nazis in Germany were under the impression that they were on the morally correct side due to the large percentage of people agreeing that it is important to take away the Jew's civil rights in order to help their country prosper. (Wreen, 2019)
