

FIGHTING

FOR

CHANGE

1

WE DEMAND

financial support by the government in the seek of education because chances for education should not be based on wealth since this broadens the gap between rich and poor

2

WE DEMAND

an easier access in the work-force provided by the university through programs and workshops because our contribution to humanity should reach its full potential.

3

WE BELIEVE

it would be beneficial for college students to be introduced to the financial skills for making your own living to learn to be financially independent.
